b. Action change codes indicated in the left-hand margin of the listing page denote the following:

N — Indicates an added item

C — Indicates a change in data

R — Indicates a change in NSN only

1-5. Location of Repair Parts

a. This manual contains three cross-reference indexes (sec. IV, V, and VI) to be used to locate a repair part when either the National stock number, reference number, manufacturer's part number, or reference designation is known. The first column in each cross-reference index is prepared, as applicable, in numerical or alphanumerical sequence. The last column of each cross-reference index lists the index number assigned to the part.

b. Refer to the appropriate cross-reference index (para 1-2c, *d*, *e*) and note the index number in the last column; then refer to the repair parts list to locate the index number which is listed in ascending order in column 1 of the repair parts list.

1-6. Federal Supply Code for Manufacturers

The last line in the description column indicates the reference number followed by the applicable Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.
